Welcome

Thank you for your purchase of the Kinivo BTB300 Bluetooth USB Adapter (Version 3.0). The Bluetooth USB Adapter creates cable-free connections between your PCs and other Bluetooth devices. Bluetooth USB Adapter supports the latest Bluetooth version 3.0 specification standards and is compatible with all Bluetooth certified devices.

Features

- Compliant with Bluetooth standard version 3.0 (Backwards compatible with Bluetooth 2.0 and 2.1)
- Support for Microsoft Windows XP, Vista, Windows 7, Windows 8, Mac OS (10.3.9+)
- Easy operation and set up

System requirements

- Processor: All latest Intel and AMD processors, Intel Celeron / Pentium III, IV; AMD Duron / Athlon
- Operating System: Microsoft Windows XP, Vista, Windows 7 or Windows 8, Mac OS (10.3.9+)
- System memory: 64MB at least
- Hard Drive Free Space: 250MB

Before you start (Windows)

Please remove any previous version of Bluetooth software that may exist in your system.

The removal procedure is as follows

Step 1: Click Start/Settings, then select Control Panel

Step 2: In the Control Panel window, double click Add/Remove programs icon

Step 3: Locate the program WIDCOMM or any other Bluetooth Software and remove it

Mac OS

BTD300 on Mac OS does not need any driver installation. Just install the BTD300 dongle and it should start working.

Driver Installation (Windows)

The following steps guide you through installation of the WIDCOMM Bluetooth driver in Windows XP, Vista, Windows 7 and Windows 8.

Note 1: Windows 8 should download and install the drivers automatically when the USB adapter is plugged in for the first time. Please follow the below steps if automatic driver installation does not work.

Note 2: You may either follow the CD Procedure or the Alternate procedure (internet access required).

CD-Based Procedure

- The BT-D300 package should include a software CD corresponding to your Windows version. Insert the software CD into CD/DVD drive of your PC. An auto-installation program will start to guide you through the process.

Note: Please browse to the CD drive under “My Computer” in case the program does not start automatically.

- The installation program will remind you to plug in the Bluetooth USB adapter if you did not insert it already.
- Your computer should be Bluetooth enabled after the installation.

Alternate Procedure

- Download the latest drivers from Broadcom website (BT-D300 uses Broadcom chipset). <http://www.broadcom.com/support/bluetooth/update.php> (alternatively search “broadcom bluetooth driver” on the internet – make sure you download only from www.broadcom.com).
- An alternate link to the drivers can be found at <http://downloads.kinivo.com>
- Run the installer – it will ask you to insert the dongle.

- The software might take up to 30 minutes to finish the process.
- Your computer should be Bluetooth enabled after the installation.
